

Column Name	Data Type	Explanation
Age	Integer	The age of the individual in years.
Gender	Categorical (String)	The gender of the individual (Male/Female).
Total_Bilirubin	Float	The total amount of bilirubin in the blood (in mg/dL), which helps to evaluate liver function.
Direct_Bilirubin	Float	The amount of direct bilirubin (conjugated) in the blood (in mg/dL), a more specific form of bilirubin.
Alkaline_Phosphotase	Integer	The level of alkaline phosphatase in the blood (in U/L), an enzyme linked to liver and bone health.
Alamine_Aminotransferase	Integer	The level of alanine aminotransferase (ALT) in the blood (in U/L), an enzyme that helps identify liver damage.
Aspartate_Aminotransferase	Integer	The level of aspartate aminotransferase (AST) in the blood (in U/L), an enzyme that helps identify liver damage.
Total_Protiens	Float	The total concentration of proteins in the blood (in g/dL), which includes albumin and globulin.
Albumin	Float	The level of albumin (in g/dL), a protein made by the liver, important for maintaining blood volume and pressure.
Albumin_and_Globulin_Ratio	Float	The ratio of albumin to globulin in the blood, which helps to assess liver function and overall health.
Dataset	Integer	The dataset label, indicating the class or group of the individual in the dataset (e.g., 1 for a specific class or 2 for another, possibly related to a health condition).
